

The Client assembled an entire block just north of the main gateway to the Ohio State University campus at 15th and High Streets. Teamed with Acock Associates Architects, G2 is developed conceptual landscape plans and construction drawings for two rooftop courtyards that are the focus of this 170 unit, 445 bed mixed use development project. The six-story building across from the Wexner Center for the Arts occupies the entire block between 16th and 17th avenues, replacing a string of older buildings as redevelopment continues along the OSU campus. The two interior courtyards are located adjacent to the community rooms and exercise facilities, and directly above the parking lot. Landscape materials include planters with irrigation, wood decking, artificial turf, seat walls and recycled building materials from the old Bernie's Bagels building.

PROJECT INFORMATION

- Location:** Ohio State University
- Client:** Edwards Communities
- Services:** Conceptual Landscape Design
Graphic Presentation
Construction Documentation
