

G2 Planning + design provides professional planning and landscape architectural design services for many of the developments at Polaris. NP Limited utilizes our skills at creating initial site plans for many of the tenants who are exploring a location at Polaris. After these initial planning studies are completed, we are often asked to provide landscape architectural services for plan approvals and construction. Built projects in Polaris include IKEA, Cabela's, Staybridge Suites, Residence Inn and the Duluth Trading Company. Our firm is also involved in the Westar development portion located in Westerville.
