

Overview and Experience:

Gary is a results-driven design professional with over 30 years of proven success as a Landscape Architect and Land Planner. He has created development plans and design standards for sites ranging from 100 to 5000 acres. Outstanding in public relations, he presents Development Plans to communities in a manner that balances private and public goals and ideals and that reduces or eliminates community opposition to development. Gary is an informed researcher and analyst who excels at assessing the feasibility of a client's program for a piece of land with special consideration of the land's unique physical and political constraints. A registered landscape architect and certified planner, Gary's knowledge of large-scale site design and urban design is extensive. He is an advocate for walkable communities, conservation subdivisions, and green infrastructure. His passion for sustainable design patterns in the landscape and his understanding of the complex relationships between design, preservation and land economics are apparent throughout his diverse body of work.

SELECTED PROJECTS:

Bexley Gateway, Bexley, OH

Main Street is the retail corridor of this elegant Central Ohio suburb, and it contains many fine restaurants, shops and a popular movie theatre. This re-development of a residential block on the edge of this corridor fulfills the vision outlined by the city for Main Street, and transitions from commercial uses along Main Street to residential uses along Parkview Drive. The mix incorporates restaurants with offices above that screen a surface parking lot and luxury condominiums above a secure parking garage.

Harrison West, Columbus, OH

Manufacturing uses had begun to encroach into this neighborhood located 5 blocks north of downtown Columbus. The developer applied for Clean Ohio funds to re-develop this urban brownfield site and return it to a traditional urban neighborhood. The City of Columbus has approved tax increment financing (TIF) funds for improvements to public spaces in this neighborhood. The housing mix includes condominiums, townhomes and detached SF homes. A neighborhood park anchored by a new gazebo is designed to foster community gatherings on the banks of the Olentangy River.

Cabela's Polaris, Columbus, OH

Provided complete site civil and landscape design services for this flagship store in Central Ohio. Included site planning, grading/drainage and landscape plans, and involved coordinating site compliance plans and CC plans with the City of Columbus' Building and Development Services Division. Responsible for coordinating architectural design review plans and submittals to the Polaris Design Review Committee to ensure that Cabela's corporate requirements and preferences for this first store in Ohio met the pre-established standards of the master developer (NP Ltd). CT CONSULTANTS

Interstate 270/US Route 33 Interchange, Dublin, OH

The City of Dublin engaged the landscape architects to create a landscape master plan with a notable artist who was providing custom designs for the MSE walls that will line the interchange. Our role was to develop design alternatives that would be signature, welcoming, timeless, authentic, implementable and sustainable. The preferred option, which features "tilted planes" will be planted with ornamental grasses, shrubs and perennials in a grid like fashion. These planting grids will be delineated with concrete sidewalks that double as access routes for maintenance crews, and back-dropped with massive sweeping plantings of switchgrass and dawn redwoods.
