

WORTHINGTON SEVENTH DAY ADVENTIST CHURCH

Client: Seventh Day Adventist Church

Worthington, Ohio

The Worthington Seventh Day Adventist Church is located at the intersection of Dublin-Granville Road and Andover Street. The landscape architects performed the entire site planning for this project including the layout of the main entry drive, parking areas, and private courtyards. The site plan preserves many of the existing mature trees, vegetation and drainage on the site. Landscape design was also performed as a service to the building committee of the church, and installation was completed by the church members. Because of its tall steeple which dominates the landscape, the church has been recognized by the Worthington community as the eastern gateway into the city.
